

SCRIPTS ON TI68K CALCULATORS (Guide under construction, Apologies, the English language is not my native language)

By: Jaime Meza www.eonicasys.com.co

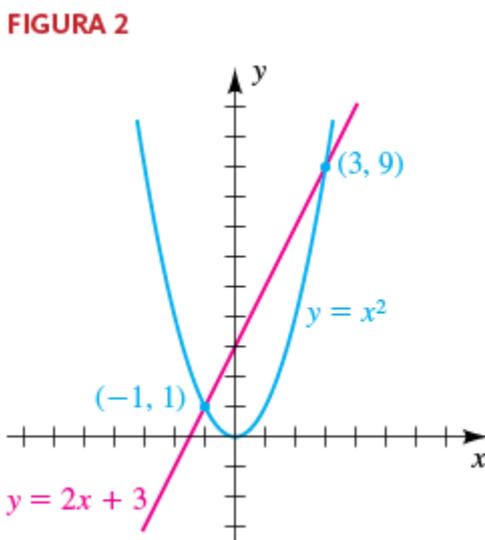

Revision: 1.3 Feb 9 - 2017 ©

Comments, suggestions, etc. are welcome at eonicasys@gmail.com

EXAMPLE #1 Solve the following system of two equations and check their solutions.

$$\begin{cases} y = x^2 & ec(1) \\ y = 2 \cdot x + 3 & ec(2) \end{cases}$$

The graphs of equations ec(1) and ec(2) are a parabola and a straight line drawn in figure 2.

Ti 68K script with definitions of variables (requires the program splitsch.v2p)

Entry #	Input: entry line (source code)	Answer #	Output: CAS History
21	C:ClrHome	22	
20	C:setFold(scripts1)	21	
19	C:splitsch() ©"split LCD script:home"	20	
18	C:DelVar eqs, eq1, eq2,answer, slnsX, slnX1, slnX2, slnY1, slnY2, test1, test2	19	
17	C:DelVar x,y	18	
16	C:©"solve the following system of equations"	17	
15	C:©"and check their solutions."	16	
14	C:{ y = x^2, y = 2*x + 3 }→eqs	15	{ y = x^2, y = 2*x + 3 }
13	C:eqs[1]→eq1	14	y = x^2
12	C:eqs[2]→eq2	13	y = 2*x + 3
11	C:(eq2 eq1)→answer	12	x^2 = 2*x + 3
10	C:answer - (2*x + 3)→answer	11	(x^2-2*x-3) = 0
9	C:factor(answer)→answer	10	(x-3)*(x+1) = 0

8	C:{ part(left(answer),1)=0,part(left(answer),2)=0 }→answer	9	{ x-3 = 0, x+1 = 0 }

2	C:(eqs[1] slnX2)→slnY2	3	y=1
1	C:(eqs[1] (slnX2 and slnY2))→test2	2	true
0	C:DispHome:done	1	

Screen Capture of source code (TIEDIT Editor)

The screenshot shows the TIEDIT Editor interface with the following source code:

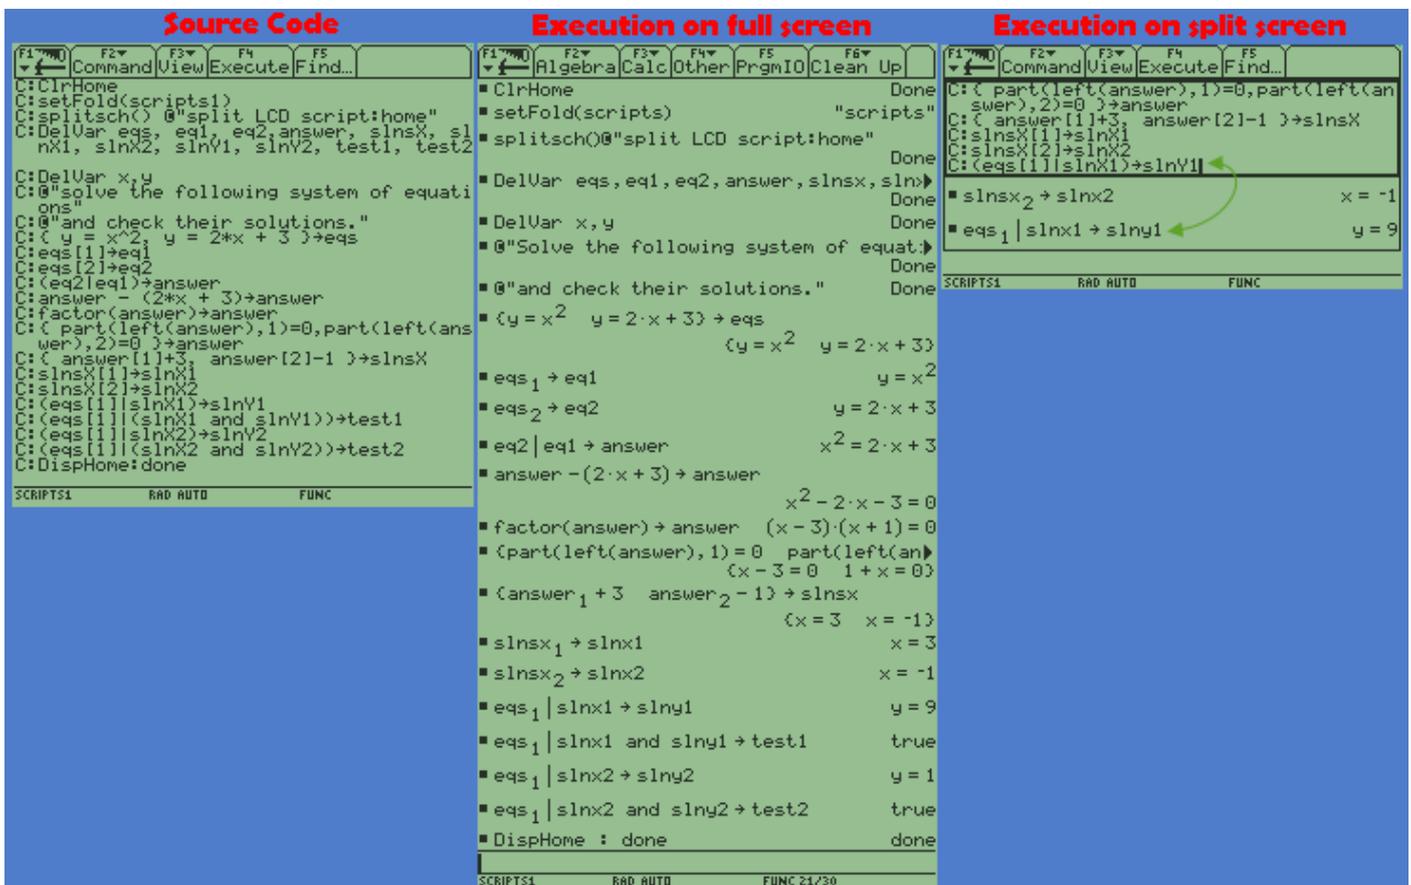

```

2 C:ClrHome
3 C:setFold(scripts1)
4 C:splitsch() @"split LCD script:home"
5 C:DelVar eqs, eq1, eq2,answer, slnsX, slnX1, slnX2, slnY1, slnY2, test1, test2
6 C:DelVar x,y
7 C:@"solve the following system of equations"
8 C:@"and check their solutions."
9 C:{ y = x^2, y = 2*x + 3 }→eqs
10 C:eqs[1]→eq1
11 C:eqs[2]→eq2
12 C:(eq2|eq1)→answer
13 C:answer - (2*x + 3)→answer
14 C:factor(answer)→answer
15 C:{ part(left(answer),1)=0,part(left(ar
16 C:{ answer[1]+3, answer[2]-1 }→slnsX
17 C:slnsX[1]→slnX1
18 C:slnsX[2]→slnX2
19 C:(eqs[1]|slnX1)→slnY1
20 C:(eqs[1]|(slnX1 and slnY1))→test1
21 C:(eqs[1]|slnX2)→slnY2
22 C:(eqs[1]|(slnX2 and slnY2))→test2
23 C:DispHome:done

```

The inset image shows the TiEmu (V200PLT) emulator displaying the script's execution on a virtual TI-84 Plus calculator screen. The screen shows the script's output, including the equations, solutions, and test results.

Run on Tlему emulator
